

What is Transition To School?

It's a five day, head start program for children who will be entering grade primary this September!

The beginning of any new experience, like starting school, can be a confusing time. You and your child are likely to be both excited and worried about this new adventure. Your child dashing away one moment and clinging tightly the next is all part of being five. Simply being aware of these mixed feelings can go a long way towards making the adjustment to starting school.

Even though your child may seem unsure about separating from you, they are in a stage of development that is pushing them towards greater independence and a desire to do things on their own.

Transition to School is designed to support your child and help them feel pride in their accomplishments. We provide an opportunity for your child to experience learning in a small group setting prior to their entry into grade Primary. The program focuses on helping your child feel good about themselves and the changes that are about to take place in the near future.

It is our goal to provide a variety of materials and activities that will interest your child and contribute to their adjustment into the school setting, as well as promote the development of learning skills.

Parents and community members are a vital part of the Transition to School program. It is an opportunity to participate and share in their children's early education.
